

Vmc Training and Angle Of Attack Indicators

The General Aviation Joint Safety Committee determined the number of fatal multi-engine accidents can be significantly reduced by periodic Vmc and engine failure practice and stall/spin accidents reduced with use of Angle of Attack Indicators in General Aviation aircraft. Emerging AOA Indicators are available for retrofit to GA airplanes at affordable prices.

Directions: From I-55 go North on Weber Rd., turn left at Clow International Parkway and go to end of road, make right at airport sign. Continue past stop sign and hangars on access road to parking lot. The Illinois Aviation Museum is the hangar across from display aircraft facing the runway.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
